

ProBio Feed EM Plus

Liquid Probiotic

ProBio Feed EM Plus – is a natural, broad-spectrum probiotic supplement developed for the bird's digestive tract normal flora and its representatives on a biosynthesis product basis. The mechanism of this supplement is the micro-organism rivalry for a ration of nutrients and a place in the digestive tract, feed conversion. Probiotics have immunoregulation. This is a probiotically effective complex supplement that, by its effects, fill the individual micro-organism functioning and adjust their effectiveness. Probiotics improves feed conversion and bird productivity.

Zootechnical additives: micro-organisms (cfu/ml):

- *Lactococcus lactis* PCM B/00039 – $7,2 \times 10^9$
- *Carnobacterium divergens* PCM CCP 2012p – $7,2 \times 10^9$
- *Lactobacillus casei* (B PCM/00080 – $7,2 \times 10^9$
- *Lactobacillus plantarum* PCM B/ 00081 – $7,2 \times 10^9$
- *Saccharomyces cerevisiae* PCM CCP 2059p – $7,2 \times 10^7$

Fermented molasses, water, sea salt, brown rice extract, cherry, blueberry and apple juice concentrates.

Physical properties: liquid, brown to dark brown; pH 3,45 ±0,2

Biological specifics:

Stimulates metabolism changes of the animal's digestive tract;

Improves nutrient ration digestibility;

Antagonistically affects the harmful microflora;

Increases the vitality and resistance of individuals;

Strengthens the broilers immune system and stimulates their protective reaction to the negative environmental factors;

Quickly restores the useful microflora balance;

Increases the bird's productivity and conservation.

Usage: Probiotic ProBio Feed EM Plus used through drinking water, by dilution of the 1:5000-10000.

Contraindications: none

Incompatibility: The product's production technology makes it compatible with non-aggressive plumbing systems, for all feed ingredients, industrial installations and service staff.

Precautionary measures: When working with this product it is advised to comply with personal hygiene standards.

Withdrawal period: Without restriction.

Package: package 10 l. The containers are labelled by indicating the product's name, manufacturer, product's ingredients, its purpose, production date, shelf life and batch number.

Expiration date: 1 year from the date of manufacture. Store in a cool, out of direct sunlight in a sheltered, that is not lower than 0 °C place, with the manufacturer's packaging intact. Do not use if pH is higher than 3,9.
